DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest a photosensitive apparatus, comprising: a first video line, a first correction capacitor on the first video line; at least one dark photosensor, the dark photosensor being adapted to receive no light thereon, outputting a reference signal onto the first video line; a second video line; a second correction capacitor on the second video line; a multiplexing node, accepting signals from the first video line and the second video line; final correction means for performing an offset correction operation on signals downstream of the multiplexing node, the final correction means including a main correction capacitor associated with the multiplexing node, the main correction capacitor adapted to retain a correction charge thereon to influence the voltage signals from the active photosensors from the first video line and the second video line; and means for determining the correction charge on the main correction capacitor, said determining means including means for sampling a plurality of voltage signals from the dark photosensor over time and deriving the correction charge based on a plurality of sampled voltage signals from the dark photosensor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
